

iicorr integrity wins further favour

iicorr has secured a contract with Botas International Limited (BIL). The contract is worth in excess of \$1M and will involve iicorr developing integrity management documentation along with operational support and technical advice. The remit covers pipelines, facilities, structures, ports and harbours throughout Turkey.

The first part of this work will be undertaken within iicorr's Aberdeen base where risk based systems will be developed to ensure safe operations of the plant and equipment. Thereafter, iicorr will be responsible for implementing these across Turkey on behalf of BIL and will be supplementing its existing staff-base in Aberdeen and establishing a workforce in Turkey.

Peter Falconer, Contract Manager

Peter Falconer commented: *"We are delighted to have won this contract with BIL. Integrity management is often misunderstood or seen as an unnecessary expense, however, BIL recognise the importance of effective management of integrity and the benefits this can bring from a safety, environmental and business perspective. This work represents a significant investment for our new client and it is fantastic to be involved with a company with the reputation and standing of BIL".*

"We are pleased that the international oil and gas market has been quick to recognise both the quality of the product and personnel provided by iicorr. Being a relatively new company, iicorr has the ability to develop systems and challenge practices in a relatively short time period. These skills will be utilised as we develop and implement systems in a geographical area that iicorr has previously been un-active in. Our aim is to take the knowledge and skills which we have developed in Aberdeen and export them into new areas."

This contract follows on the heels of a number of other integrity management deals secured within the last 3 months, which will see iicorr delivering in Azerbaijan, Georgia, Indonesia, Australia along with international agreement with a refinery company.
